A Talmage Patient Lost A Large Sum

Antonio Colora today continued his search for a $2695 mattress in San Francisco. Mr. Colora tucked his life's savings into a mattress in a room he occupied at 30 Houston St., San Francisco, last January. Then Mr. Colora was taken to the state hospital at Talmage for treatment. Last Saturday Mr. Colora returned to San Francisco. He went to his old home to find the building remodeled and the mattress with its $2695 missing. Nobody seems to know what became of the mattress or the money. Mr. Colora told Police Lieutenant Edward Copeland.

EX-FERRY HEAD IS FOR THE SPAN

Harry A. Speas, Golden Gate Ferry Chief, Talks Of Bridge

The Golden Gate bridge can be built and operated at a profit to taxpayers. What is more, it will be built in spite of arguments being made against it to confuse people of San Francisco and north bay counties. These were the statements of Harry E. Speas, former vice-president and general manager of the Golden Gate Ferry Company.

At Old Practices.

Mr. Speas, who went on record in favor of the bridge while operating the transbay ferry system, verbally flayed anti-bridge workers. "The same people who now are raising the hue and cry the Golden Gate bridge will not pay; that there is not sufficient traffic to justify its construction; that it will be an added burden to the taxpayers, are the ones who battled to the last ditch to prevent the establishment of the Golden Gate Ferry," Mr. Speas declared. "Their arguments then were the same ones that are being used now against the bridge. They have raised the same questions whenever the matter of any great public improvement that would benefit San Francisco and the bay area has come up."

Mr. Dutton is reported to be interested with Caspar Ornbaun in ranches on the coast and in Anderson Valley. He is also an owner in a big property near Laughlin station, north of this city.

4-H CLUBS AND THEIR AMBITIONS

(Contributed)

Nowhere in rural communities is a wiser use of leisure made than in the planned and supervised work of boys' and girls' 4-H Clubs. It is a part of the National Program of the U. S. Department of Agriculture and in California is conducted under the supervision of the Extension Service of the University of California, through Farm Advisors, Home Demonstration Agents and local leaders.

Instruction in these 4-H Clubs is given by means of farm, home and community demonstrations and club activities and is carried on by the young people themselves, for the purpose of helping them to improve rural farm and home practices and the social life of the communities; second, showing the possibilities of rural life; third, aiding those who so desire to become efficient farmers and homemakers; and, fourth, teaching rural girls and boys how to make of themselves public-spirited, useful citizens and leaders in rural affairs.

What Name Means.

The four H's are: Head, Heart, Hands and Health, and the club pledge is as follows: "I pledge my Head to clear thinking, my Heart to greater loyalty, my Hands to longer service, and my Health to better living for my club, my community and my country."

Work Out Of School.

The 4-H Club work is voluntary and is carried out in leisure time outside of school activities. It is concerned with the active processes of some form of agricultural activity such as gardening, or the growing and marketing of some crop, the rearing of livestock or poultry, making of clothing and proper selection of that clothing, which must be purchased, the proper furnishing of some room in the house, and better weight and nutritio n.

Membership Is Large.

In the United States there are 756,096 boys and girls enrolled, and in California there are 9000. The club provides opportunity for members to share home responsibilities in keeping with their ability, and helps emphasize the home, since the work centers in and around the home. Members meet from time to time, conduct meetings along parliamentary lines, give reports of their progress, conduct demonstrations of their work, sing songs, give yells, and have a generally good time as young people must have if one is to succeed with them in conducting a club for them. The 4-H Club work is a public enterprise, administered with public funds, supervised by public officials and is maintained wholly in the public interest.

Steam Engines Will Be Displaced Here

ATTACK FAILS

(Continued From Page One)

from now, or even five when the bridge is built.

Weave Cable On The Job.

Mr. Duncan explained several engineering details of the bridge, such as the weaving of the huge suspension cables and the towers from which they will be supported. The cables will be woven right on the job as it would be impossible to lift the completed lines into place. Late developments in the manufacture of steel cables makes possible the construction of an entire suspension bridge instead of the combined cantilever and suspension type which was originally planned. This type will compare to the new Hudson river bridge at New York where the latest invention in cable construction is being applied.

Chamber Of Commerce Blamed.

The San Francisco Chamber of Commerce, instead of coming out with a carefully guarded endorsement containing its series of "ifs," should have been right out in the lead from the start as the bridge is the biggest thing that can happen to San Francisco.

Acted Unfairly.

The editor of The Republican Press was a guest of the San Francisco Chamber of Commerce at its famous dinner at which a series of questions, all double-barreled, and which, if answered guardedly would have been unsatisfactory and which could not be answered in full at the time, because the figures being made by the bridge engineers, state highway officers and the state railroad commission had not been concluded, were propounded. At that meeting every member of the board of directors of the Golden Gate Bridge and Highway District knew the San Francisco Chamber of Commerce, because of the powerful influence exerted over it by certain unfriendly interests, was not seeking enlightening information to be used to co-operate with the Golden Gate Bridge directors, but rather, was anxious to complicate the situation, if the Chamber of Commerce directing heads could find something with which to do so.

MERWIN WILL BE LIBERATED

Slayer Of Aged Woman To Obtain Freedom From Asylum

One more inmate of the ward for the criminal insane at Talmage is likely to walk out within a short time, under a ruling of the court on the "not guilty by reason of insanity" law—that section of the California penal code which requires persons found to have been insane when they committed crime to be confined in a state hospital for one year before a sanity examination looking to their release can be granted is constitutional, the state supreme court ruled last week.

Law Is Sound.

By its ruling the court upheld the year's confinement that had been imposed on Jerome Merwin, army warrant officer, convicted of murdering his mother-in-law, Mrs. Isabel M. Carleton, in Santa Rosa, and placed upon his attorneys the necessity of bringing a habeas corpus action to win Mr. Merwin a sanity hearing in the Mendocino state hospital for the insane. Jerome Merwin has been held in the hospital for a week over a year while his attorneys awaited the supreme court's decision on the appeal.

Early Freedom Seen.

Attorneys believe Mr. Merwin will now be given his freedom when his counsel, Ernest Spagnoli and Walter F. Lynch, of San Francisco, demand and obtain a sanity hearing for him, as permitted by the code. Alienists at the Mendocino asylum testified in the superior court hearing that preceded the appeal to the supreme court Jerome Merwin is sane. Judge H. L. Preston at that time, however, upheld the one year's confinement clause of the penal code, passing to the state's highest tribunal the responsibility for determining its constitutionality.

Two Are Involved.

Jerome Merwin and Mrs. Mary Slayback, found to have been insane when she murdered her estranged husband at Sacramento, are affected by the court's ruling.

How Court Ruled.

Both defendants appealed to the supreme court for a sanity hearing, contending they are now sane and that the year's confinement is illegal. They also hold they are now being punished for a crime committed while insane. "We are not convinced that detention in the hospital can be said to be imprisonment for punishment of any crime," the court said. "Nothing can be clearer than the duty of the state to restrain and confine the insane, not only for their own safety and protection, but that of the public." The court also pointed out there are many forms of insanity and it is often difficult to detect its existence, and it declares a year is not too long for determination of the prisoner's condition.

Big Booster Edition Has Been Completed

The regular mailing list includes 7,000 persons and organizations, in addition to which 25,000 extra copies of the rotogravure insert will be printed and sent to chambers of commerce in the state.

VICTIM ASKS COMPENSATION

Man Injured By High Power Wires Wants Higher Rating

Recalling the power line accidents which on successive days two years ago caused the death of two men and the serious injury of two others, an examiner of the industrial accident commission was in Santa Rosa last week to hear the petition of W. T. Babcock, 35, of Rincon Valley, for an increased disability rating that will increase his compensation. Mr. Babcock was critically burned near St. Helena August 6, 1928, in an accident in which Victor Lawson, of Santa Rosa, was electrocuted while stringing lines of the Snow Mountain Water & Power Company.

Ukiah Man A Victim.

Twenty-four hours after this accident W. P. Clark, a superintendent of the same company with headquarters in Ukiah, was killed near Fulton in a similar accident and another man was badly burned.

His Hands Are Useless.

Mr. Babcock, despite the fact his hands were rendered useless and his body was so badly burned he has never recovered sufficiently to be able to work, has been rated as 66 per cent disabled, entitling him to 65 per cent of his salary for 260 weeks. His attorney, L. R. Lambert, will seek a rating of 90 per cent disabled, which will bring the accident victim a life income. Allowances for life are allowed all workmen insured under the workmen's compensation insurance fund who are rated more than 70 per cent disabled, the amount of the income increasing with the percentage rating.

Hit Safeguards.

In the hearing Attorney Lambert charged the Snow Mountain Company with "serious and wilful misconduct" for the manner in which the men were required to work at the time Mr. Babcock was injured. Under pressure of speed orders, the attorneys contend, the power company force was not surrounded by sufficient safeguards against injury. Attorneys for the Pacific Gas & Electric Co., now owner of Snow Mountain Co. property, and for the state compensation fund contested Mr. Babcock's claim for higher rating and increased compensation.

FAR FROM HOME

J. T. Talbot, of Ketchikan, Alaska, was the motorist fartherest away from home registered in this city last week. Mr. Talbot left Alaska several months ago, stopping in Seattle to take delivery of an automobile with which to make a trip to Mexico.

Women are welcoming the *all-electric* kitchen

Electricity heats water for 1/2 to 1/3 cent per gallon

WOMEN appreciate the cleanliness and the convenience of the all-electric kitchen. These are two reasons why almost every one of our customers today who is selecting an electric range is also selecting an automatic electric water heater.

Heating water with electricity is practical. Many electric water heaters installed for P. G. and E. customers, over 10 years ago, are still supplying dependable hot water service.

Another reason why women like the automatic electric water heater is that it offers flexibility in operation—

1. You may operate the heater manually — Turn the switch and heat the quantity of water desired and then turn the switch off. This is the most economical method.

2. You may turn the switch on in the morning and leave the heater operate automatically during the day and then turn the switch off for the afternoon or evening.

3. You may leave the switch on all the time and enjoy hot water 100% automatically — day and night. You'll have plenty of hot water at the turn of the faucet. Still, you will never have to watch the heater.

Automatic electric water heaters come complete with insulated storage tank. Or if you like, you can obtain the automatic heater without the tank and attach the heater to your present tank.

For full details telephone or call at our office—or a dealer's store.
